The grade 1 reading pages in this packet are ordered so that each new page builds on the sight words learnt in previous pages. For this reason, it is recommended that you introduce the sight words in the order that they are presented in this book.

# Introduction

## **About this book:**

This book contains 44 Grade 1 sight word fluency sentence reading sheets. They make ideal homework reading practice pages for children in Kindergarten (Prep) and Grade 1.

Repeated reading of a new sight word is important for memorising the word and for developing reading fluency; therefore, children are encouraged to read each sheet 5 times, colouring an insect each time they do so.

## **Directions for use:**

The grade 1 sight word reading sheets in this packet are ordered so that each new sheet builds on the sight words and vocabulary learned in the previous sheets. This Grade 1 unit also builds on previously learnt words from the Pre-Primer and Primer units. For this reason, it is recommended that you introduce the sight words in the order that they are presented in this book.

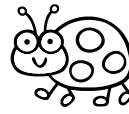

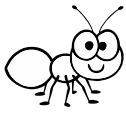

Each sheet includes 8 sight words sentences and a column of pictures and matching words for children to refer to if they need assistance reading non-sight words. Each time all 8 sentences have been read, children colour an insect to reflect their efforts.

These sheets may be stored in a homework reading folder or binder in individual plastic sleeves (pockets), and can be read over and over again to ensure sight words are not forgotten as new ones are being introduced.

Happy Teaching :)
